

Your Solar Power Checklist

Future Sustainability is the **only** solar retailer in Australia offering all of the benefits listed below, with premium Invert Energy solar panels.

We also feature a value range that utilises the same high quality products, with pricing to compete with the best in Australia.

✓ Industry Leading Warranties

- ✚ Future Sustainability's 'premium' solar power systems feature a **15 year** solar panel product warranty - **three times longer** than the 5 year product warranty offered by most manufacturers.
- ✚ This means you are **protected** for the full 15 year REC redeeming period during which you are obligated to maintain a working system.
- ✚ Our 'value' solar power systems feature a **10 year** solar panel product warranty – **double** the industry standard.
- ✚ Many resellers “hide” their short 2 - 5 year solar panel product warranty in their fine print and only advertise the longer panel output warranty which is far less comprehensive – **we publish both**.
- ✚ Future Sustainability's 'premium' solar power systems come standard with **10 year** inverter warranties – **double the length** of most other brands.
- ✚ All of our warranties are **backed by local insurers here in Australia** – you will never need to deal with an overseas manufacturer or insurance company.
- ✚ Of course all our solar panels include a **full 25 year performance warranty**.

✓ **Testing** - Our solar panels are **flash tested** at the factory, and then **batch tested** at an independent Australian NATA testing facility before arriving to our warehouse.

✓ **Small Deposit** - We only require a **small deposit**, most of which is **refundable** if you change your mind. Many of our competitors require a much larger deposit, which is usually 100% non-refundable.

✓ **Guaranteed REC Discounts** - Our **REC discounts are fixed** when you return your signed quote form. Some of our competitors reserve the right to charge you above the quoted price if market REC values drop between order and install dates, which can add thousands of dollars to the price you expect to pay.

✓ **Guaranteed Products** - **Future Sustainability guarantee to install the quality products you accept**. Some resellers reserve the right to supply brands/models different to what was accepted on the quote.

✓ **Short Install Times** - Future Sustainability can usually have a fully operational system installed on your roof **within 4-12 weeks**. Some resellers' fine print says they will attempt to “install within 6 months” and we have had clients come to us after waiting up to 10 months for another reseller to install.

✓ **Customer Satisfaction** - Some of our clients have refused to sign other reseller contracts because they included clauses that waived responsibility for any damage done to your home during install – **we do not**. In the very unlikely event of a problem, we will correct it, as **customer satisfaction is a top priority for us**.

✓ **Face to Face** - **Our team of consultants offer personalised service and advice**, and happy to meet with you to view your home, and discuss in far greater detail than over the phone or email.

✓ **Racking** - Future Sustainability uses **market leading** solar panel racking systems. Not all racking is created equal! Our “**Cyclone 3 rated**” racking is raised higher to prevent debris (leaves etc.) from being trapped under panels, and for increased airflow to keep panels cooler for **better performance** in warmer weather.

Quality, Confidence, Value

We scoured the earth - Asia, the Americas, Europe, the Middle East - and tested a lot of panels in our search to define what is the best panel for our buying group to bulk purchase.

Our panels were tested in an Australian independent NATA testing facility - noting performance, build quality, and price point. After extensive searching, testing over 18 months, we are proud to bring our Invert Energy branded panel to you.

Future Sustainability is proud to say that we do more product/quality testing than any other importer/deemed manufacturer in Australia. Every panel is flash tested at the factory, and we also batch test every container to ensure the highest quality.

Future Sustainability absolutely guarantees the quality of the product that is installed on your roof. So much so that we offer the longest product warranty in the Australian market and will continue to keep it that way. The service and warranty is backed by a publicly listed company, giving you, the customer, total peace of mind.

Solar Power Warranty Comparison

	Future 'Premium'	Future 'Value'	Most Others
Inverter	10 years	5/10 years	5 years
Solar Panel Labour	10 years	10 years	1 - 5 years
Solar Panel Product	15 years	10 years	2 - 5 years
Solar Panel Performance	25 years	25 years	20 - 25 years

When investing in solar power, would you 'cross your fingers' with short warranties that expire before the system has even paid for itself ?

Or sit back and relax with peace of mind, knowing you have the longest warranties in the Australian solar market. Warranties backed locally here in Australia by an ASX listed company.

Testimonials

Solar Power 2.16 KW, Elanora

Problem-free installation in 3 hours. Bob & Tim polite and efficient. Meter ran backwards yesterday until almost 6PM and again today from 6AM. Thank you again. Another 11.99 KW today. It is performing above my expectations and your claims, Darren. Very happy

Solar Power and Solar Hot Water, Ascot

Hi Future Sustainability, we just received our first power bill after installing solar power and solar hot water. We are happy to note that our savings have exceeded our expectations. We were so impressed with the friendly staff and we appreciate that your company gave honest no bull information and had our financial interest at heart. Regards
