# The Solar Power Story

'Solar Power' supply solar hot water solutions to large home builders in the Australian Market. They have now made a strategic decision to pass on savings and quality product to the open market. 'Solar Power' engage a NADA testing facility to batch test tanks and collectors in trying conditions.

- 'Solar Power' vitreous enamel tanks last over 400,000 pulses, Australian Standards require 170,000 pulses
- Collectors tested in frost conditions (down to minus 16 degrees Celsius)
- 5 year warranty on tanks and collectors
- One of the only hot water units suitable for frost locations and or hard water conditions. The end user always feels comfortable with the durability of a 'Solar Power' hot water solution
- 'Solar Power' have built a reputation on not only quality product but quality of service
